3. He stated that a bulk variance is required for the building height which is less limited to less than six inches.

Mr. Savage briefly spoke about the height.

Peter Vandicoor further described the height variance and that it would be difficult to tell by looking, it's a de minimus deviation and spoke about how this supports the goals of the Master Plan. He stated that there are positive criteria and that the project promotes A, B, C, D.E, H of the Master Plan. He stated that the property has a hardship because of the unique shape which requires fill to be brought in because of flood zone. The positives outweigh any detriment. The site is suited to the use of 49 townhomes. There is no negative impact to the public good and continued to explain how it meets the criteria for the variances.

Mr. Wells questioned that once the project is constructed will this no longer be in the flood zone.

Mr. Mullen agreed.

Mr. Stockton asked if there were any public questions but there were none.
